Technical Skills

Programming Languages:	Web Development:	Tools:	Database:
Java, C#, C++ (learning)	HTML, CSS, Bootstrap JavaScript, ReactJS	Bash shell, Docker Unix/Linux (learning)	Firebase, SQL, MySQL, SQLite

Projects

Nomo | BCIT Winter Hacks Hackathon   Dec 2021

- Created a web app within 48 hours that cultivates the perfect response for any invitation
- Contributed to the design and layout of the website, and incorporated the use of the Google Firebase database into the project
- Technologies: Google Firebase, JavaScript, CSS, HTML
- URL: Nomo Website

BC Nails Salon| Website for local business   June – July 2023

- Designed and implemented an intuitive and visually appealing user interface for the website, utilizing best practices in us
- Developed and implemented website features using ReactJS, a popular JavaScript library for building dynamic and responsive user interfaces. Gained proficiency in the technology through self-study and practical experience, including design and development of user-friendly features, as well as incorporation of feedback from the business owner.
- Technologies: HTML, CSS, JavaScript, ReactJS, Vercel
- URL: BC Nails Website

Kumon Strawberry Hill| Student Progress Dashboard   Jan – April 2023

- Refactored an existing codebase for a web-based dashboard that enables supervisors at Kumon Strawberry Hill to view student progress and manage student data, upgrading it from an older version of .NET to the newest version.
- Developed data import functionality that enables supervisors to upload and synchronize student data from different sources, such as Excel spreadsheets and CSV files.
- Integrated a feature from Twilio that enables supervisors to send text messages and emails directly from the dashboard, improving communication with parents and students.
- Technologies: .NET framework, C#, HTML, CSS, JavaScript, Excel, CSV, Twilio
